Advanced Wound Care Dressings

Designed to promote a moist environment, thereby accelerating the healing of many difficult-to-treat wounds or chronic wounds. Substances that help to provide ideal moisture conditions include alginate fiber, foam, and hydrocolloid dressings.

**DynaDerm**

Hydrocolloid Dressing
- Can be worn for several days
- Maintains a moist environment
- Used on non-infected wounds such as ulcers
- Thin edge for better skin adhesion

**CuraFoam**

Foam Dressing
- Maintains a moist environment, while preventing bacterial contamination
- Used to manage minor and acute wounds
- From ulcers to donor sites

**DynaLevin**

Waterproof Adhesive Bordered Foam
- High absorbency while obtaining a moist environment
- Used to manage chronic and acute wounds

**FoamFlex**

Non-Adhesive Waterproof Foam
- Sterile foam dressing with a semi-permeable film – prevents bacterial contamination
- Used for ulcers and low to moderate exuding wounds

**DynaFoam**

Waterproof Bordered Foam
- Multi-layer dressing with a low adherent layer that protects the wound
- Used on ulcers, chronic and acute wounds, and donor sites

**SiliGentle**

Silicone Foam Dressing
- Consists of a silicone wound contact layer, super absorbent pad layer and a vapor permeable and waterproof film
- The gentle silicone layer can be moved without losing its adherence
- Can minimize pain and trauma to wound and its surrounding skin
- Provides superior absorption and locks exudates away

**DynaSorb™**

Super Absorbent Dressing
- Rapidly absorbs wound exudate into super absorbent polymer core
- Minimizes the risk of maceration and leakage

**CuraFoam™**

AG Silver Foam Dressing
- Foam dressing infused with silver ions for antimicrobial protection
- Ionic silver inhibits microbial growth, preventing colonization on the dressing to help manage the wound
- Absorbs up to 5 times its own weight
- Used as a barrier to bacterial penetration and for management of partial and full thickness wounds such as pressure ulcers, 1st and 2nd degree burns, surgical wound sites, diabetic ulcers and donor sites

## Advanced Wound Care Dressings

### SiliGentle™ AG Silver Silicone Dressing
- Antimicrobial soft silicone foam dressing that absorbs exudate
- Maintains moist healing environment

### DynaFoam™ AG Bordered Silver Foam Dressing
- Self-adherent primary foam dressing with silver ions and a secondary adhesive border
- Ionic silver inhibits microbial growth, preventing colonization on the dressing to help manage the wound
- Absorbs up to 5 times its own weight
- Vapor permeable border is waterproof and leakproof, providing effective protection against contamination

### DynaGinate™ AG Silver Calcium Alginate Dressing
- Provides 3 days of continuous antibacterial protection (same as Calcium Alginate, with antibacterial silver)
- Used on infected wounds and wounds suspected of possible infection
- Maintains moist healing environment

### DynaGel™ Hydrogel Impregnated Gauze Dressing
- Suitable dressing for gentle packing of dry to minimally exuding deep wounds
- Enables moist healing environment

### ActiGuard™ Hydrogel Dressing
- Wound dressing that is permeable to air and moisture vapor which allows excess moisture to evaporate and the wound to breathe
- Used on 1st and 2nd degree burns and skin tears

### DynaGinate™ Calcium Alginate Dressing
- Used as a topical wound dressing for moderate to high exuding wounds absorbing up to 17 times its own weight

### Xeroform Petrolatum Dressing
- Sterile, fine mesh gauze impregnated with a blend of Petrolatum, Bismuth thiophanate, mineral oil, and Paraffin oil
- Maintains moist healing environment

### Petroleum Gauze Dressing
- Non-adherent primary dressing that maintains a moist wound bed for healing
- Cotton gauze impregnated with petroleum for a smooth and conforming dressing
- Used for non-draining wounds such as tube sites, skin grafts, circumcision, burns, non-infected wounds, pressure ulcers (Stages 2, 3, 4) and abrasions

### DynaGuard™ Waterproof Composite Dressing
- Multi-layer dressing with a low adherent layer that protects the wound
- Used on ulcers, chronic and acute wounds, and donor sites

### Dynarex L-Mesitran Wound Dressing
- Creates a moist wound environment
